Naviextras Toolbox and Camps 11 on HN Navigators

The latest release of Camps it was never intended to support the HN family of products and owners of these units get new free content even though the main icon does not change.

The program shows it is loading the content, but it causes a valid concern to the customer when it the icon does not change when choosing a Camps "Place".

In can be confirmed two ways that Camps 11 has load by stepping through the menus to confirm.

1)

- Tap on More...
- then right arrow to ? Help and tap on it
- then tap **About**
- then More
- Then tap **Content**
- Now tap on the down arrow to **Places** and tap on it
- There will be a Tab labelled "Australia Rich POI hema 2021.Q1"

This is the new Camps 11 file loaded by Naviextras (Without the new Icon)

2)

- Tap **Destination**
- Then Find Places
- Then Custom Search
- Chose Around here
- Using the down arrow a "Camps 11 Locations" Tab will be displayed
